

✓ 2026.2

## 26.2.xxx.xxx [RTM]

Released on Jun 19, 2026

### New Features

#### License Management — DSL Generator & Demand Calculation

- Editor for DSL Expression for power users. RCOR-2964
- DSL Generator drives Demand Calculation when VM Maintenance Licensing is required. (already shipped via earlier improvements; now general-purpose)

#### Organization Units — Dynamic Assignment

- New Rule Set view for OUs with rule-based device assignment engine. RCOR-1446, RCOR-1680
- OU rule-set re-evaluation mechanism so device moves recompute automatically. RCOR-2873
- Blacklisted Device view for Organization Units. RCOR-1696

#### Resource Groups — Dynamic Assignment

- Dynamic Assignment view on the Resource Group Details page. RCOR-2787
- Dynamic device assignment engine extended to Resource Groups. RCOR-2852

#### Inventory & Discovery

- Kubernetes Inventory data model. RCOR-687
- Container Inventory with SBOM data model. RCOR-699
- Probe for web services on inventory. RCP-621
- New SNMP plugin. RCP-627
- TCP/UDP connections in Windows + Linux inventory. RCP-612

#### MMI / Usage

- New Instrument result type to hold MMI data, imported via RVIA. RCOR-2357
- Device data model extended to store DbUsage. RCOR-2358, RCOR-2360, RCOR-2362

#### Contract Analyzer

- Two-phase extraction pipeline (OCR + parallel LLM agents). RCOR-2823
- Pricing intervals detection (recurring billing). RCOR-2924, RCOR-2925

- Net / gross / tax field detection. RCOR-3067
- Cleanup worker for orphaned analyzer artefacts. RCOR-2144

### **License Contracts & Products**

- Product Suites overview. RCOR-2991
- Products overview directly in License Contracts. RCOR-3001
- Untracked-software tab in the entitlement area. RCOR-2383

### **UI**

- Top-right menu consolidated into a "..." button. RCOR-1611
- Device Details Advanced Mode. RCOR-1559
- Evidence Details View. RCOR-1562

### **Test Automation**

- AIO Tests Playwright reporter integration (results auto-published to AIO). RCOR-2522
- Troubleshooting test suite, file-upload helper, network helper, helper refactoring. RCOR-161, RCOR-2696, RCOR-2976, RCOR-2977

### **Integrations & Documentation**

- Advanced settings on the SAM Cloud integration. RCOR-2399
- VMware inventory documented in the user guide. RCOR-2535
- MMI import documented in the user guide. RCOR-3010

---

### **Improvements**

#### **License Management & Compliance**

- Demand is now editable. RCOR-2332
- Total cost column on the License Allocations page. RCOR-2412
- VM vs Host demand handling for custom DSL expressions. RCOR-2551
- Complex VM licensing supported via DSL. RCOR-2491
- Multi-model / multi-metric product pricing. RCOR-2318
- License Models split into separate rows in the Add Entitlement wizard. RCOR-1970
- Allowed license model combinations restricted in the contract wizard. RCOR-2364
- Contract creation no longer requires a pre-existing catalog product. RCOR-2384
- Improved product display and sorting on Entitlement & Compliance pages. RCOR-2410

- Maintenance balance and virtual demand now considered in compliance evaluation. RCOR-2148
- Background-task status and logs are viewable. RCOR-3136
- "Virtual" state naming and values unified across the app. RCOR-2817
- Skipping CAL items in compliance — now stops. RCOR-2897
- Recurring pricing intervals/periods supported. RCOR-2924

### **Resource Groups & Performance**

- Dynamic device assignment for OUs — major performance work. RCOR-2899
- Resource Group Details UI overhaul. RCOR-2807

### **RVIA / Runners**

- RVIA upload aware of runner-to-scope assignment. RCOR-1954
- Credentials owner exposed. RCOR-2942

### **AI Chat (Raynée)**

- AI Chat controller refactored to RESTful resource-based endpoints. RCOR-2321
- Reusable GraphQL aggregation in chat. RCOR-2492

### **Contract Analyzer & Codex**

- Custom DSL expressions for complex descriptions (Deloitte). RCOR-2320
- AI-driven contract import extended for Contract ID and PO Number. RCOR-2558
- License product term description via codex. RCOR-2581
- Awaiting-time indicator while the analyzer processes. RCOR-2459
- DSL Expression interface updates and metric-definition cleanup. RCOR-2658, RCOR-2544, RCOR-2676
- Pyright type-error fixes in analyzer. RCOR-2983

### **Catalog & Discovery**

- Specific devices identified during discovery runs are listed. RCOR-2462
- Specific devices identified during connector runs are listed. RCOR-2972
- Search-product trigger button for manual entries. RCOR-2959
- Windows Store app vendor normalization. RCOR-2572

### **Platform**

- .NET 10 migration. RCOR-3070

- Angular migration. RCOR-2774
- Health checks extended to cover Redis. RCOR-1726
- License-management controllers feature-gated. RCOR-2326
- Release-vulnerability sweep. RCOR-3024

## **UX polish**

- Improved Excel export of data grids. RCOR-761
- Search panel on Automation page (export mode). RCOR-1556
- Better auto-generated calendar events. RCOR-2806
- Software data grid Fingerprints UI/UX improvements. RCOR-2953
- Contract-wizard action button UI improvements. RCOR-3109
- Edit-name consistency in Product Suites. RCOR-3060
- Action-button order/placement in Product Suites. RCOR-3048
- Product count shown in license-contract wizard summary. RCOR-3061

## **Smaller UI fixes (Minor)**

- Table overflows, capitalization of "ID", required-field indicators, copy-button on Secret API key dialog, profile-page tweaks, custom-script add-button icon, license-contract name & currency required marker, calendar agenda label, timeline graph, etc. — RCOR-576, RCOR-1352, RCOR-1753, RCOR-1903, RCOR-1977, RCOR-2079, RCOR-2117, RCOR-2406, RCOR-2437, RCOR-2442, RCOR-2472, RCOR-2792, RCOR-2822, RCOR-3064, RCOR-1205, RCOR-582, RCOR-592, RCOR-1564

---

## **Resolved Issues**

### **Compliance & Demand**

- VMware usage in demand calculation. RCOR-2469
- Resource Group demand incorrectly calculated due to shared device ownership. RCOR-2369
- Compliance calculation downgrade issue; downgrade and upgrade calculation; downgrade calculation failure; downgrade/upgrade not editable in compliance. RCOR-2267, RCOR-2785, RCOR-2954, RCOR-2821
- Override handling in `CustomVmHostDemandService` and host-evaluation order. RCOR-2651, RCOR-2687
- Compliance record deletion during recalculation caused UI issues. RCOR-2755
- Wrong / inconsistent compliance status. RCOR-2930

- Compliance cannot be deleted. RCOR-2879
- Maintenance-model entitlement displayed in entitlement list. RCOR-2960
- Perpetual & Maintenance issue based on expiration. RCOR-2996
- Edit compliance records with entitlement family. RCOR-2424
- Currency setting not applied correctly in Entitlement view. RCOR-2458
- License start/expiration shifted by UTC conversion on DB write. RCOR-2368
- Overlicensed threshold logic clarified. RCOR-2505
- Different prices per product not represented in entitlement details. RCOR-2963
- Edit item dialog refactored. RCOR-3058
- Add entitlement missing allocation functionality. RCOR-3057

### **License Contracts & Products**

- Critical bugs in `LicenseContractEntryWizardComponent` . RCOR-3002
- Contract upload-button not clickable. RCOR-2864
- Contract wizard error when adding new suite. RCOR-3132
- Adding products with invalid version. RCOR-2070
- Invalid product name allowed when editing contract. RCOR-2372
- Cancelling contract upload didn't stop product search. RCOR-2984
- Missing product version. RCOR-2985
- Product Suite name and SKU showed "Unknown". RCOR-2956
- Big product name from contract analyzer. RCOR-2980
- Product icon lost after changing product detail version. RCOR-2378
- Allow "0" as valid Demand quantity. RCOR-2653
- Add Entitlement page filtering / sorting in product selection. RCOR-2757
- Page not updated after editing an entitlement; entitlement list footer not updated. RCOR-2123, RCOR-2060
- Filtering issues across Entitlements/Compliance pages. RCOR-2253, RCOR-2423, RCOR-2179, RCOR-2461
- Compliance Software Details link wrong. RCOR-2251
- Excel export had more columns than data grid. RCOR-2751, RCOR-2799
- Inconsistent file naming in data grid exports. RCOR-3053
- Cannot import/export Excel files. RCOR-1843
- Software/OS versions Excel-import issue with extended-support date. RCOR-2645
- Empty columns in Vulnerability → Software Excel export. RCOR-2692

- Header filter icon and parent/sub-item rule filter dropdown. RCOR-3100, RCOR-3089

## **Inventory & Discovery**

- Cannot perform inventory runs on Windows from Linux runner. RCOR-2900
- Oracle probing — missing service name. RCOR-2886
- Oracle service ports cannot be changed. RCOR-991
- Oracle services missing BannerFull data. RCOR-2479
- Add Oracle databases issues. RCOR-2557
- Linux virtual machines discovery issue. RCOR-1816
- Filter by Source column in Discovery run device grid errored. RCOR-1899
- Devices not properly displayed in 'All devices' grid. RCOR-2164
- Cannot delete some devices. RCOR-2445
- Devices/Files: filter by Path returned 500. RCOR-2539
- Hyper-V & VMware ESXi service filter caused LINQ error. RCOR-2483
- Even when device hosted on vSphere, virtuality shown as "Unknown". RCOR-2961
- VMware import should work with VMware credentials. RCOR-2437
- VMware source filtering missing on Devices grid. RCOR-2438
- ZT Windows (Python): missing MSSQL data. RCP-578
- ZT Windows (Python): WinRM not used when WMI fallback enabled. RCP-592
- ZT Unix: Debian inventory incomplete. RCP-611
- Inventory scan stuck on devices with Docker. RCP-523
- ZT Unix: GeneralProcessScanner timeouts. RCP-529
- Unix file scans with content failed. RCP-531
- Linux inventory missing IP address. RCP-571
- File scan creates duplicate results. RCOR-1173
- Validation rejected filenames containing dots. RCOR-2202
- Active Directory import validation broken/missing. RCOR-1310
- Connector wizard losing data when navigating between steps. RCOR-2433
- Connector runs cannot be filtered by Connector column. RCOR-2325
- Catalog integration search mode fix. RCOR-2527
- Inventory job status now shows cancelled jobs. RCOR-2822
- Cancel Job issue. RCOR-1811
- Filtering Cancelled inventories did not work. RCOR-2401

- Inventory attempts not properly ordered. RCOR-2322
- Device targeting issues. RCOR-2330
- Editing advanced settings in Data Hub didn't work. RCOR-2986
- Cloud runner couldn't be determined as a valid runner. RCOR-2550

### **Agent / Runner / RVIA**

- Agent could not connect after applying new AgentSettings. RCOR-1750
- PackageStore packages not uploaded to S3 during import. RCOR-2475
- Package Store: OutOfMemory on multiple queries. RCOR-2379
- Fix package-store import wizard. RCOR-2353
- Cannot save instrument settings under QAMode auth. RCOR-1755
- RVIA service: cannot add new config when basic auth chosen. RCOR-2691
- Single Scope Mode: runner targeting issues for Asset Manager roles. RCOR-2715, RCOR-2716, RCOR-2719, RCOR-2720, RCOR-2105, RCOR-2742
- Runner targeting doesn't work properly. RCOR-2402
- Stuttgarter // Custom Script Type AllUnix scanned on Windows. RCOR-2881
- Self Service Portal: stale-state stuck loop. RCOR-2232
- Self Service Portal: passwords stored in localStorage not deleted. RCOR-2165

### **Permissions & Roles**

- Administrator → credential permission issue. RCOR-2721
- User Role → Inventory Oracle DB button issue. RCOR-2698
- Admin → Software, Product Version permission issue. RCOR-2713
- Permissions → credential overview counts not respecting permissions. RCOR-2720
- OAuth 2.0 credentials should not show username/password. RCOR-2245

### **Migration / Database**

- PostgreSQL migration error due to SuiteHashKey index filter. RCOR-3006
- Migration error for MySQL on Docker. RCOR-2878
- Invalid DateTime kind for PostgreSQL. RCOR-2354
- Migration for IsVirtual property change (DBs). RCOR-2518
- Invalid foreign key constraint on `DynamicAssignmentRuleFilterConditions`. RCOR-2811
- Integer out of range on Device Software → Products. RCOR-2091
- DemandUpdateTask fails. RCOR-2460

- Virtual column refactoring for device-related tables. RCOR-2501
- Align LM with DeviceVirtualStatuses refactoring. RCOR-2502
- `GetByLoadOptions` performance issues on License Management. RCOR-2503
- Cleaning code in LM. RCOR-3042

### **AI Chat (Raynée)**

- UI issues in AI Chat after Angular migration. RCOR-2862
- Inconsistent / incorrect installation counting depending on prompt wording. RCOR-2825
- Wrong answers for software queries. RCOR-2247
- Wrong number of software products and versions. RCOR-2246
- Wrong AI Chat results for license queries. RCOR-2249
- Pricing prompts fail to identify product. RCOR-2661
- Cluster details prompt to validate. RCOR-2662
- License consumption by cluster server prompt fails. RCOR-2663
- Upcoming-renewals prompt fails. RCOR-2664
- Unused licenses by entitlement product family fails. RCOR-2666
- SUM with GraphQL gives inconsistent results. RCOR-2207
- Codex usage for DSL generation. RCOR-2183
- Codex call "encyclopedia/ProcessQuery" fix. RCOR-2427
- Better display of tables in chat. RCOR-2660
- File upload — concerns by Claude. RCOR-2743
- Unable to re-attach a previously deleted file. RCOR-2745
- Forces document re-attachment on follow-ups. RCOR-2559
- Documents not completely processed when asked for summary. RCOR-2573
- Voice mode audio continues after closing chat. RCOR-2327
- Parallel message processing during active response. RCOR-2593
- Hide dashboard section when no dashboard data. RCOR-2758
- Hyperlink behaviour for AI-generated grid name fields. RCOR-1564
- License-model labels reverting to numeric values after contract upload. RCOR-2717
- Cleanup of uploaded files in chat storage. RCOR-2301
- Inconsistent license-compliance retrieval (direct vs summary). RCOR-2592
- Inconsistent / incorrect SQL Server failover-cluster instances data. RCOR-2827
- Devices with exceeded EOS Windows Servers. RCOR-2669

- Filtering entitlements by vendor uses suppliers and wrong function. RCOR-2298
- Inconsistent entitlement count between Chat and Contract details. RCOR-2430
- AI is unable to pass 'tool calling purpose' argument. RCOR-2085
- Entitlements of model perpetual + maintenance handled badly. RCOR-2037
- Wrong date format in AI Chat. RCOR-2260
- Incorrectly spaced technical terms in chat reasoning. RCOR-2286
- Contract products summary issue when prompting. RCOR-2540
- Contract-product details follow-up question fails. RCOR-2416
- Missing license pack size in PO entitlement comparison. RCOR-2431
- AI-Chat filtering issues on license-related questions. RCOR-2465
- Voice control configuration incomplete or missing in `appsettings`. RCOR-2796
- gpt51 fails on OpenAI integration. RCOR-2803
- "License Metric" formatting in AI Chat table. RCOR-2792
- Freezes when opening new chat while assistant is thinking. RCOR-2171
- Fix or remove non-working predefined prompt. RCOR-2275
- Cleanup non-working predefined prompts. RCOR-2275
- First message sent on AI chat not displayed. RCOR-2981
- AI-Chat Claude Sonnet usage in dashboard creation removed. RCOR-2453
- AI-Chat Voice Mode audio cleanup. RCOR-2327
- AI-Chat advanced settings not applied for existing integration. RCOR-2870
- Implement validation/error handling for unsupported currencies in text/PDF imports. RCOR-2932
- New page in PDF causes loss of information. RCOR-2940

## **Translations & Text**

- Broken translations in License Management. RCOR-3114
- Replace hardcoded strings with translation keys in Endpoint Management workspace. RCOR-2847
- Daily AD Import — missing translation and error warning. RCOR-2219
- Missing translation when unassigning multiple scopes from runner. RCOR-2310
- Language issue in Exception section on Connector Run Details. RCOR-2376
- Multiple monthly text reviews / typos. RCOR-2121, RCOR-2534, RCOR-2789, RCOR-2790, RCOR-3009

## Contract Analyzer

- License Pack issue parsing. RCOR-2262
- Bad model and metric guess. RCOR-2622
- Invoice number mixed up with PO number. RCOR-2545
- Patrizia invoice parsing failure (PoC). RCOR-2804
- File-import failures. RCOR-2296
- More metrics recognized. RCOR-2348
- Update analyzer Dockerfile to use `uv`. RCOR-2917
- Warning message for CAL contracts improved. RCOR-2406

## DSL Generator (specific fixes)

- LogicalCore usage in demand calculation. RCOR-2290
- RelayToVmHost field in VM/Host demand calculation. RCOR-2585
- Windows Server Datacenter logic. RCOR-2588
- Metric-definition rename: `physical_cores` → `cores`, `processors` → `cpus`. RCOR-2602
- RamBased metric not matched. RCOR-2659

## Contracts & Entitlements UI

- Three-dots menu not visible on integration cards. RCOR-2393
- Why "license expiration" on timeline. RCOR-2470
- Model incomplete for entitlements & compliance. RCOR-2471
- Error in entitlements table under license contracts. RCOR-2949
- Error when adding products with different license models. RCOR-2526
- Catalog version images not updated. RCOR-2647
- Add entitlement missing allocation functionality. RCOR-3057
- Edit name inconsistency in product suite. RCOR-3060
- Catalog recognition error. RCOR-2317

## Calendar & Notifications

- Action Center: notification not auto-dismissed. RCOR-2200
- Action Center: rejected credentials not reflected real-time. RCOR-2851
- Calendar agenda member count wrong. RCOR-2071
- Cannot create calendar event for negative timezones. RCOR-2039
- Calendar refresh button doesn't show loading. RCOR-2038

- Cannot save calendar event details after edit. RCOR-2261
- Incorrect event sequence in license timeline. RCOR-2350
- Auto-generated calendar events readability. RCOR-2806

## **Wizards / UI Behaviour**

- Wizard sidebar navigation didn't reflect custom-settings toggle states. RCOR-2700
- User can open multiple wizard instances simultaneously. RCOR-2819
- Inventory wizard does not close after device selection. RCOR-2872
- Inventory wizard displays "Discover" instead of "Inventory". RCOR-2845
- Browser proposes to store credentials even after abort. RCOR-1334
- Add new network "Next" button stays inactive after invalid CIDR fix. RCOR-1471
- Add new device — toast message missing. RCOR-1834
- Standardize next button on progress step. RCOR-1874
- Selected fields still appear in "Show More Fields" list. RCOR-2464
- Page-level data not updated after editing entitlement, calendar event, license allocation. RCOR-2061, RCOR-2062, RCOR-2123
- Filtering not working in License allocations grid. RCOR-2124
- Adding daily AD Import — missing fields. RCOR-2219
- Compliance product card "-" for missing values. RCOR-2441
- "Cannot deselect devices" cases. RCOR-2443

## **Datagrids & UX**

- Cover screen missing on column chooser when discarding. RCOR-192
- Column moved to border. RCOR-2654
- Inconsistent text overflow handling in datagrid columns. RCOR-3064
- Some icons remain on small viewports. RCOR-2780
- Compliance product icons overlap on horizontal scroll. RCOR-2435
- Software icons not displayed in "Commercial software without entitlements". RCOR-2440
- Vulnerability score layout broken. RCOR-2832
- Mobile view: Raynet link overlapping Update License button. RCOR-248
- Mobile view: Integrations details. RCOR-254
- Wizard list view — column headers misplaced. RCOR-546
- "Open" file dialog opens twice on contract upload (Chrome/Edge). RCOR-3117
- Validation doesn't work properly for the 'Path' field. RCOR-3087

- Authorize-runner old loading animation. RCOR-103
- Cannot click on edit when too many ports. RCOR-1733
- Console error in Resource Group Details tabs. RCOR-1894
- Inventories — selected summary not required. RCOR-1892
- Header text overflow on small screens. RCOR-2439
- Missing toolbar separator on Organization Units page. RCOR-2542
- Missing margins between UI elements in Import settings. RCOR-2556
- Missing "Selected Item Count" footer in Entitlements grid. RCOR-3041
- Fix alignment in Entitlement details — License timeline. RCOR-3047
- Wizard colours wrong. RCOR-3081
- Last demand sync filter not working because of time. RCOR-2995
- Validation date error when editing Device inventory job. RCOR-2444
- Filtering by Source/Path/Path-segments returned 500. RCOR-2539
- Empty Suppliers in catalog. RCOR-2317
- Devices tab missing for OS fingerprints view. RCOR-2555
- Fingerprints table: broken page in Software details. RCOR-2795

## **Integrations & Configuration**

- Integration disabled state cannot be applied. RCOR-3102
- Integration timeout/maxAttempts controls in Data Hub settings. RCOR-2341
- Missing SAM Cloud integration gives no warning. RCOR-1969
- SAM Cloud preconfigured API key not set correctly. RCOR-1997
- Editing integration shows misleading error after save. RCOR-1998
- 500 server load on bad integration connection-string edit. RCOR-1749
- Catalog integration search-mode fix. RCOR-2527
- Encyclopedia → Codex naming. RCOR-2623

## **Linux Runner / Distribution**

- Cannot perform inventory runs on Windows from Linux runner. RCOR-2900
- Linux Runner fails on Windows ZT Python. RCP-611
- Devices in Linux inventory missing IP. RCP-571

## **Misc**

- Dashboard shows incorrect computed data in nightly env. RCOR-3073
- Reeval mechanism didn't recompute devices not yet in an OU. RCOR-3108

- Rule deletion reeval problem. RCOR-3127
- Scope cannot be deleted after removing runner assignment. RCOR-2151
- Scope name uniqueness fails on whitespace. RCOR-2100
- Connector wizard losing data when navigating between steps. RCOR-2433
- VMware Vsphere URL validation issue. RCOR-2683
- Device processes commandline cutoff. RCP-478
- File scan timeout not visible in instrument logs. RCP-527
- Vulnerabilities count missing. RCOR-2177
- Vulnerability count display issue on fingerprint details page. RCOR-2500
- Recommendations for cost savings. RCOR-2289
- Missing toolbar separator on Organization Units page. RCOR-2542
- Plugin name typos and module review. RCOR-217
